

NESTLE measuring wheel MR-21

Article number: 12003001
Cross-country measuring wheel

DESCRIPTION

Measuring wheel for cross-country measurements

Measuring wheels are used for measuring distances on ground. You hold the guide rod and push the measuring wheel forward along the measuring section. The distance traveled is displayed by means of a counter. Typical areas of application are: official use, road and track construction, agriculture and forestry, landscaping, construction and wherever distance measurements over medium to long distances are required. The **NESTLE measuring wheel MR-21** has a foldable guide rod made of aluminium and equipped with a spoked wheel. The high quality counter records the distances in the direction of travel and subtracts against the running direction. The MR-21 measuring wheel also offers a parking bracket and an integrated brake. NESTLE measuring wheels are always **"Made in Germany"**.

APPLICATIONS

Applications

- Quality counter "MADE IN GERMANY" above the measuring wheel attached, easy to read.
- Counter also counts backwards, subtractions are possible.
- Zero lever right next to the counter enables a quick Reset.
- Running rubber is ground to a diameter of exactly 318.5 mm.
- Highest precision <0.02% - is certified with a test sticker.
- The frames of our measuring wheels are robot-welded and guarantee a constant quality and extreme robustness for years.

SPECIFICATIONS

Wheel	Spoke wheel
Measuring range	9,999.99m /cm reading
Wheel diameter	318,5 mm
Wheel circumference	1,00m
Accuracy	<0,02%
Weight	2,950g
Colour	red, luminous paint

ACCESSORIES

MIT DEN BESTEN MESSEN

Scope of delivery

- Measuring wheel MR-21 including carrying bag with log

Accessories

- Carrying case, artificial leather covering, model no. 12900000.
- Carrying bag, model no. 12901000.
